

The idea of i want to create a platform for pet industry, proposal by Nextify

Idea Problem Snapshot

Pet owners struggle to find a wide range of products and services, including hotels, flights, health information, and veterinarians. This challenge is significant as it affects pet care quality and convenience. With the pet industry growing, addressing this gap is crucial for enhancing user experience.

JTBD by User Role

User Role	Jobs to be Done (JTBD)	Pain
Pet Owners	Discover products and services for pets	Limited variety and options
Pet Sitters	Find clients and manage bookings	Difficulty in visibility
Veterinarians	Connect with pet owners for services	Low engagement with pet owners
Pet Businesses	Promote offerings to a targeted audience	Ineffective marketing channels

Idea Brainstorm Uses

- **Product Discovery:** Pet owners currently search multiple websites and apps for pet products, often leading to frustration and inefficiency.
- **Service Booking:** Users book services like pet sitting and veterinary appointments via phone calls or in-person visits, which is time-consuming.
- **Health Information Access:** Pet owners rely on general online searches or social media for health advice, lacking a centralized source for reliable information.
- **Travel Planning:** Pet owners manually research pet-friendly accommodations and travel options, often missing out on available deals or options.
- **Community Engagement:** Users engage in local pet owner groups on social media for recommendations, which can lack credibility and consistency.
- **Marketing for Businesses:** Pet-related businesses use social media and flyers to promote services, facing challenges in reaching targeted audiences effectively.
- **Client Management for Sitters:** Pet sitters manage clients through spreadsheets or informal communication, leading to disorganization and missed opportunities.
- **Veterinarian Outreach:** Veterinarians use traditional marketing methods to connect with pet owners, often resulting in low visibility and engagement.

Audience & Early Adopters

Segment	Why They Care
Pet Owners	Seek convenience in finding diverse products and services for their pets.
Pet Sitters	Need a platform to increase visibility and attract clients efficiently.
Veterinarians	Desire improved engagement with pet owners for service offerings.
Pet Businesses	Look for effective marketing channels to reach targeted audiences.

Market Notes

- **Growth:** The pet industry is expanding rapidly, with increasing demand for diverse products and services.
- **Location:** Berlin has a vibrant pet community, offering a potential user base.
- **Technology:** Increasing smartphone usage among pet owners facilitates app-based solutions.
- **Competition:** Existing platforms often lack comprehensive offerings, presenting an opportunity for differentiation.
- **Budget:** Focus on cost-effective marketing strategies and lean development to maximize limited resources.

Competitors (Direct & Adjacent)

- **Chewy** — Online retailer specializing in pet products with a wide selection.
- **Rover** — Platform connecting pet owners with pet sitters and dog walkers.
- **Petfinder** — Service for finding adoptable pets and connecting with shelters.
- **Wag!** — App offering dog walking, pet sitting, and boarding services.
- **Vetstreet** — Provides pet health information and connects pet owners with veterinarians.

Market Size (TAM / SAM / SOM)

Assumptions:

Metric	Assumption	Value
Global innovation spending	Total global investment relevant to this idea	\$2000000000
Serviceable %	Fraction of TAM that is serviceable	10%
Obtainable %	Fraction of SAM realistically obtainable	5%

Calculations:

- TAM = $\$2000000000 \times 1 = \2000000000
- SAM = $\$2000000000 \times 0.10 = \200000000
- SOM = $\$200000000 \times 0.05 = \10000000

Assumptions & Risks

- Users will prefer a single platform for pet-related services over multiple sources.

- Pet owners are willing to pay for premium listings or services.
- The demand for pet-friendly travel options is significant in Berlin.
- Pet businesses will actively engage with the platform for marketing.
- Users will trust the platform as a reliable source for health information.

Key Risks

- Low user adoption due to existing habits of using multiple platforms.
- Competition from established pet service platforms.
- Regulatory challenges related to pet health information.
- Difficulty in acquiring a critical mass of pet businesses.
- Limited budget may hinder effective marketing and outreach.

How to Test (Lean)

Assumption	Test	Success Metric	Timebox (months)
Users prefer a single platform	Conduct surveys and interviews with pet owners	70% positive feedback	2
Willingness to pay for services	Offer a paid trial for premium listings	50 sign-ups	3
Demand for pet-friendly travel	Analyze search trends and conduct focus groups	200+ inquiries	2
Engagement from pet businesses	Reach out for partnerships and collect interest	30 businesses express interest	3
Trust in health information	Create a landing page with expert content	500+ visits and 50% return rate	2

Product Candidates

- Concept A — A comprehensive platform for pet owners to discover and book products and services.
- Concept B — A community-driven marketplace connecting pet owners with local pet services and businesses.
- Concept C — A centralized hub for reliable pet health information and resources.

Feature Candidates & RICE

	Reach	Impact	Confidence	Effort	RICE
	500	4	0.8	3	53
	300	5	0.7	4	26
	400	3	0.9	2	54
	200	4	0.6	5	96
	250	3	0.5	3	12

How RICE Was Computed

- Reach = people per week.
- Impact = 1–5 scale.
- Confidence = 0–1.
- Effort = person-weeks.
- RICE = (Reach × Impact × Confidence) ÷ Effort.

Lean Objective & Key Results (Next Quarter)

Objective: Build a comprehensive platform for the pet industry to enhance product and service discovery.

Key Result	Baseline	Target	Data Source
Number of products listed	0	500	Platform database
User sign-ups	0	1,000	User registration data
Service bookings made	0	200	Booking system data

Customer Journey Storyboard (Quarter 1)

Discover

Element	Description
Trigger	Pet owners seek products/services for pets.
User Action	Users search online for pet-related options.
Success Metric	Number of unique visitors to the platform.
Instrumentation	Google Analytics to track website traffic.

Activate

Element	Description
Trigger	Users find the platform and explore offerings.
User Action	Users create accounts and browse products/services.
Success Metric	Number of accounts created.
Instrumentation	User registration tracking via backend analytics.

Outcome

Element	Description
Trigger	Users complete their first purchase or booking.
User Action	Users finalize transactions for products/services.
Success Metric	Conversion rate of first-time users.
Instrumentation	E-commerce tracking tools for transaction data.

Tools to Use

Tool	Why We Use It
Google Trends	Analyze search interest in pet products and services.
SurveyMonkey	Gather feedback from target users on needs and preferences.
Trello	Organize ideas and tasks for product development.
Figma	Design user interfaces and prototypes for the platform.
Mailchimp	Manage email marketing campaigns to reach pet owners and businesses.
Google Analytics	Measure user engagement and track platform performance.

Synthesis Summary

- **Problem:** Pet owners struggle to find a wide variety of products and services, including hotels, flights, health information, and veterinarians.
- **Target Users:** Pet owners, pet sitters, veterinarians, and pet-related businesses in Berlin.
- **Differentiators:** Centralized platform offering comprehensive access to pet services, products, and community engagement.
- **Top Features:** Product discovery, service booking, health information access, and travel planning for pet owners.
- **Key Risk:** Limited budget and solo entrepreneurship may hinder platform development and marketing efforts.
- **Next Proof Points:** Validate user interest through surveys, prototype key features, and assess competitive landscape.

Next Three-Month Plan
