

The idea of i want to create a platform for pet industry, proposal by Nextify

Problem Snapshot

Idea Problem Snapshot

Pet owners struggle to find a comprehensive platform that aggregates pet-related products, services, and information. This fragmented landscape makes it difficult to discover the best options for their pets' needs, leading to frustration and suboptimal choices. A unified platform addresses this inefficiency and offers convenience, saving time and improving pet well-being.

JTBD by User Role

User Role	Jobs to be Done (JTBD)	Pain
Pet Owners	Find and book reliable pet sitters quickly.	Difficulty verifying sitter qualifications and availability.
Pet Owners	Discover diverse and high-quality pet products.	Limited access to niche or specialized products.
Pet Owners	Access consolidated health and wellness information for pets.	Overwhelmed by conflicting or unreliable information online.
Pet Sitters	Acquire new clients and manage bookings efficiently.	High marketing costs and administrative overhead.
Vets	Reach a wider audience of pet owners seeking veterinary care.	Reliance on traditional marketing methods with limited reach.
Pet Businesses	Increase product visibility and sales within the pet owner community.	Struggle to stand out in a crowded market.

Brainstorm Uses

Idea Brainstorm Uses

Pet owners in Berlin currently face several challenges that a platform could address. They often rely on fragmented solutions to manage their pet-related needs. The platform aims to consolidate these activities into a seamless experience.

Potential use cases include:

- **Product Discovery:** Finding unique pet products not available in local stores. Current workaround: Searching multiple online retailers.
- **Service Booking:** Scheduling pet-sitting or grooming appointments. Current workaround: Contacting individual providers via phone or email.
- **Veterinary Care:** Accessing reviews and booking appointments with local vets. Current workaround: Relying on word-of-mouth or general online reviews.
- **Travel Planning:** Finding pet-friendly hotels and transportation options. Current workaround: Manually filtering travel websites.
- **Community Forum:** Connecting with other pet owners for advice and support. Current workaround: Using general social media groups.

- **Emergency Support:** Quickly locating nearby emergency vet services. Current workaround: Keeping a list of emergency contacts.

Audience Early

Audience & Early Adopters

Identifying the right audience segments is crucial for the pet industry platform's success. Each segment has unique needs and motivations that the platform must address. Focusing on early adopters will help gain initial traction and feedback.

Primary Segments

Segment	Why They Care
Pet Owners	Convenience in finding diverse products, services, travel options, health info, and reliable sitters/vets.
Pet Sitters	Access to a broader client base and streamlined booking/payment processes.
Veterinarians	Enhanced visibility, client acquisition, and tools for managing patient information.
Pet-Related Businesses	Increased sales, marketing opportunities, and direct engagement with pet owners.

Early Adopters

Early adopters are key to validating the platform and gathering feedback. They are more willing to try new products and services. They can provide valuable insights for improvement.

- * **Tech-Savvy Pet Owners:** Already using apps and online platforms for pet-related needs.
- * **Active Members of Pet Communities:** Engaged in online forums, social media groups, and local pet events.
- * **Pet Influencers/Bloggers:** Can help promote the platform and provide authentic reviews.

Lightweight Market Research Notes

Given the limited budget, focus on low-cost market research methods. These can provide valuable data quickly. This approach can reveal market viability and potential user adoption.

- * **Online Surveys:** Use platforms like SurveyMonkey or Google Forms to gather data from target segments.
- * **Social Media Listening:** Monitor relevant hashtags and keywords to understand customer sentiment and trends.
- * **Competitor Analysis:** Identify existing platforms and analyze their strengths, weaknesses, and pricing models.
- * **Community Forums:** Engage in pet owner forums and social media groups to gauge interest and gather feedback.

Competitors Market

Competitors (Direct & Adjacent)

- * **Zooplus:** Online pet supplies retailer with a broad product range.

- * **Fressnapf:** Large pet supply chain in Europe, offering in-store and online shopping.
- * **Rover.com:** Online marketplace for pet sitting and dog walking services.
- * **Tierarztpraxis.de:** Online directory of veterinary practices in Germany.
- * **Paws.de:** German online platform listing pet services and products.
- * **Petplan:** Pet insurance provider (adjacent as it caters to pet health).

Market Size (TAM / SAM / SOM)

Assumptions:

Metric	Assumption	Value
Global pet industry spending	Total global pet industry expenditure	\$261000000000
Serviceable %	Fraction of TAM that is addressable in Germany	0.04
Obtainable %	Fraction of SAM realistically obtainable in Berlin	0.001

Calculations (include \$):

- * TAM = $\$261000000000 \times 1 = \261000000000
- * SAM = $\$261000000000 \times 0.04 = \10440000000
- * SOM = $\$10440000000 \times 0.001 = \10440000

Assumptions Tests

Assumptions & Risks

Key Assumptions:

- * Pet owners are actively seeking a unified platform for pet-related needs.
- * Pet businesses (vets, groomers, hotels) are willing to pay to be listed and featured.
- * Users will trust the platform's recommendations for pet health and services.
- * A significant portion of pet owners in Berlin are comfortable using a digital platform for these needs.

Key Risks:

- * Existing platforms or marketplaces already address the core needs of pet owners.
- * Acquiring a critical mass of both pet owners and pet businesses will be challenging.
- * Building and maintaining accurate and up-to-date information on vets and pet health requires significant effort.
- * Competition from established players with larger marketing budgets.

How to Test (Lean)

Assumption	Test	Success Metric	Timebox (months)
Pet owners seek unified platform.	Launch a landing page with mockups and gauge signup interest.	100 signups in first month.	1
Pet businesses will pay for listings.	Contact 20 local pet businesses and pitch paid listing options.	Secure 5 paid listing commitments.	1
Users will trust platform recommendations.	Survey users on the importance of trust signals (reviews, certifications).	70% rate trust signals as important.	0.5
Berlin pet owners will use a digital platform.	Run targeted ads in Berlin to gauge click-through rates to the landing page.	2% click-through rate.	1
	Manually onboard 10 business partners to find potential edge cases for vet / pet sitters booking.	Find at least 3 edge cases from business partners.	2

Features Rice

Product Candidates

* **Concept A: Pet Services Marketplace.** A platform connecting pet owners with local service providers like walkers, sitters, groomers, and vets, focusing on convenience and trusted recommendations.

* **Concept B: Pet Product & Information Hub.** A comprehensive platform offering a wide range of pet products, alongside curated articles, health information, and travel tips for pet owners.

* **Concept C: Pet Travel Companion.** A specialized platform designed to simplify pet travel, providing information on pet-friendly hotels, flights, regulations, and emergency vet services in different locations.

Feature Candidates & RICE

Feature	Reach	Impact	Confidence	Effort	RICE
Local Sitter Booking	200	4	0.7	2	280
Product Recommendation Engine	300	3	0.6	3	180
Pet-Friendly Hotel Finder	150	5	0.8	4	150
Vet Directory w/ Reviews	250	4	0.9	5	180
Breed-Specific Health Articles	400	2	0.7	3	187

How RICE Was Computed

* Reach = people per week.

* Impact = 1–5 scale.

* Confidence = 0–1.

- * Effort = person-weeks.
- * RICE = (Reach × Impact × Confidence) ÷ Effort.

Okrs

Lean Objective & Key Results (Next Quarter)

Establish a user-friendly platform connecting pet owners with diverse products, services, and information in the Berlin area.

Key Result	Baseline	Target	Data Source
Registered Pet Owners	0	500	Platform Database
Participating Businesses	0	50	Platform Database
User Engagement (Avg. weekly sessions)	0	2	Platform Analytics

Storyboard

Customer Journey Storyboard (Quarter 1)

Discover

Element	Description
Trigger	Pet owner searches online for "dog-friendly hotels Berlin."
User Action	User lands on the platform's blog post listing hotels. They browse and click on a hotel link.
Success Metric	Click-through rate (CTR) from search engine results page (SERP) to platform.
Instrumentation	Google Analytics, Search Console.

Activate

Element	Description
Trigger	User is on the platform, viewing a specific pet product or service (e.g., a dog hotel).
User Action	User creates a free account to save the hotel to their "favorites" or directly book.
Success Metric	Percentage of users who create an account after viewing a product or service page.
Instrumentation	Internal analytics tracking account creation and page views.

Outcome

Element	Description
Trigger	Activated user (pet owner) has booked a pet-friendly hotel or purchased a product.
User Action	User leaves a review for the hotel or product on the platform.
Success Metric	Number of reviews submitted; repeat bookings within 30 days.
Instrumentation	Internal review tracking system; booking data analysis.

Tools

Tools to Use

Tool	Why We Use It
Miro	Visual collaboration for brainstorming and user journey mapping.
Typeform	Create surveys to validate the problem and gather user feedback.
Google Analytics	Track website traffic and user behavior on the platform.
Google Trends	Explore search trends related to pets and related services in Berlin.
Trello	Project management and task tracking for building the platform.
Figma	Design and prototype the platform's user interface.

Synthesis

Synthesis Summary

- * **Problem:** Pet owners struggle to find a comprehensive platform for pet products, services (sitters, vets), travel, and health information in Berlin.
- * **Target Audience:** Pet owners, pet sitters/walkers, veterinarians, and pet-related businesses in Berlin.
- * **Differentiation:** Offer a single platform integrating diverse pet services, products, travel options, and health resources.
- * **Top Features:** Searchable directory of vets/sitters, e-commerce marketplace for pet products, booking for pet-friendly hotels/flights, and a pet health information resource.
- * **Key Risk:** Achieving critical mass of both service providers/sellers and pet owner users.
- * **Next Proof Points:** Conduct user interviews to validate demand and willingness to pay, plus build a simple directory MVP (minimum viable product) to test service provider interest.

Three Month Plan

Next Three-Month Plan

Milestone	Owner	Metric	Duration (days)
Market Research	Solo Founder	# of interviews, competitor analysis	30
MVP Definition	Solo Founder	Core feature set	20
Prototype Development	Solo Founder	Usability score	30
User Testing	Solo Founder	Completion rate, satisfaction	20
Funding Pitch Deck	Solo Founder	Investor feedback	10
