

The idea of i want to create a platform for pet industry, proposal by Nextify

Problem Snapshot

Idea Problem Snapshot

Pet owners and pet-related businesses in Berlin lack a centralized platform to efficiently manage and access various services. This fragmented landscape leads to inefficiencies, increased costs, and missed opportunities for both pet owners and service providers. A consolidated platform can streamline processes and foster a more connected pet care ecosystem.

JTBD by User Role

User Role	Jobs to be Done (JTBD)	Pain
Pet Owners	Find reliable pet sitters quickly.	Difficulty vetting sitters; lack of trust.
Pet Owners	Access consolidated health records for my pet.	Fragmented data; hard to share with vets.
Pet Sitters	Easily find pet sitting jobs in my area.	Relying on word-of-mouth; inconsistent income.
Vets	Offer online booking and reminders to clients.	Manual scheduling; appointment no-shows.

Brainstorm Uses

Idea Brainstorm Uses

Pet owners and businesses in the pet industry currently face a fragmented market, relying on multiple platforms and services. A centralized platform could address several key needs:

- * **Booking pet travel:** Users currently compare prices and services across various travel websites and pet transport companies.
- * **Accessing health data:** Pet owners manually track vaccination records and health history, often using paper documents or basic spreadsheets.
- * **Scheduling grooming appointments:** Pet owners call or visit multiple groomers to find availability and compare prices.
- * **Finding pet sitters:** Pet owners rely on word-of-mouth, local classifieds, or general freelance platforms to find and vet pet sitters.
- * **Ordering pet food and supplies:** Pet owners purchase food from various online retailers, local pet stores, or supermarkets.
- * **Connecting with vets:** Pet owners search online directories or rely on recommendations to find local veterinary services.
- * **Managing pet training:** Pet owners coordinate with trainers by phone, often struggling to compare services.

Audience Early

Audience & Early Adopters

Primary Segments

Identifying the core user groups is essential for platform development. Understanding their needs will drive feature prioritization and marketing efforts. The primary segments for the pet industry platform include:

- * **Pet Owners:** Seek convenience and comprehensive pet care solutions.
- * **Pet Sitters/Walkers:** Need a platform to connect with clients and manage bookings.
- * **Veterinarians:** Can use the platform for appointment scheduling and health data management.
- * **Groomers:** Benefit from increased visibility and appointment management tools.
- * **Pet Food/Supply Retailers:** Want to reach a targeted audience and boost sales.
- * **Pet Travel Services:** Aim to connect with pet owners planning trips.

Early Adopters

Focusing on early adopters can provide valuable feedback and drive initial platform adoption. They are more tolerant of imperfections and eager to try new solutions. Ideal early adopters include:

- * Tech-savvy pet owners.
- * Independent pet sitters/walkers looking to expand their client base.
- * Small, local pet businesses seeking affordable marketing solutions.

Market Notes for Berlin

The pet industry in Berlin is thriving, reflecting a broader trend in pet ownership. Key market characteristics include:

- * High pet ownership rates, particularly dogs and cats.
- * Increasing demand for premium pet products and services.
- * Growing awareness of pet health and wellness.
- * A strong community of pet lovers and advocates.
- * Many local businesses, creating opportunities for partnerships.

Segment	Why They Care
Pet Owners	Centralized pet care management
Pet Sitters	Client acquisition, booking management
Veterinarians	Appointment scheduling, data access

Competitors Market

Competitors (Direct & Adjacent)

- * **Rover:** Specializes in pet sitting and dog walking services.
- * **PetBacker:** Offers a broader range of services, including pet boarding, grooming, and vet visits.
- * **Zooplus:** An online retailer focusing on pet food and supplies.
- * **Tierarzt24:** Online platform for veterinary advice and services.

* **Pawshake:** Connects pet owners with local pet caregivers.

Market Size (TAM / SAM / SOM)

Assumptions:

Metric	Assumption	Value
Global pet industry spending	Total global spending on pet-related products and services	\$270 Billion
Serviceable %	Percentage of the global market applicable to an all-in-one platform	0.1%
Obtainable %	Percentage of the serviceable market realistically obtainable in Berlin within 3 years	0.5%

Calculations (include \$):

* TAM = \$270 Billion $\times$ 1 = \$270,000,000,000

* SAM = \$270 Billion $\times$ 0.001 = \$270,000,000

* SOM = \$270 Million $\times$ 0.005 = \$1,350,000

Assumptions Tests

Assumptions & Risks

* **Platform Adoption:** Pet owners and businesses will actively use a consolidated platform.

* **Monetization Viability:** A sustainable revenue model can be established (e.g., commissions, subscriptions).

* **Data Privacy:** Users will trust the platform with their pets' sensitive data.

* **Partnership Interest:** Vets, groomers, and other services will be willing to partner.

* **Regulatory Compliance:** The platform can comply with all relevant data and pet-related regulations in Berlin.

* **Competition:** Existing platforms and local services will hinder adoption.

* **Data Security Breaches:** The platform is vulnerable to data breaches.

* **Scalability Issues:** The platform struggles to handle user growth.

* **Lack of Funding:** Insufficient funding to sustain development and marketing.

* **Changing Pet Owner Needs:** The platform fails to adapt to evolving needs and trends.

How to Test (Lean)

Assumption	Test	Success Metric	Timebox (months)
Platform Adoption	Launch a landing page with explainer video and gauge signup interest.	100 signups in first month.	1
Monetization Viability	Run pricing surveys to understand willingness to pay for features.	30% indicate willingness to pay for premium features.	1
Data Privacy	Conduct user interviews to understand data privacy concerns.	Identify key concerns and address them.	2
Partnership Interest	Contact 20 local businesses (vets, groomers) to gauge partnership interest.	Secure 5 letters of intent.	2
Regulatory Compliance	Consult with a local legal expert on data and pet-related regulations.	Identify key compliance requirements.	1

Features Rice

Product Candidates

- * **Concept A: PetPal Central:** A comprehensive platform connecting pet owners with all essential services, from vet appointments and grooming to pet sitting and specialized food suppliers, enhancing convenience and care.
- * **Concept B: HealthPet Pro:** A data-driven platform focused on tracking and managing pet health through integrated data from wearables, vet records, and nutritional analysis, aiding preventative care and informed decision-making.
- * **Concept C: Pet Adventures:** A marketplace platform specialized in pet-friendly travel and leisure activities, including booking pet-friendly accommodations, guided tours, and connecting with local pet communities, facilitating enriched experiences.

Feature Candidates & RICE

Feature	Reach	Impact	Confidence	Effort	RICE
Vet Appointment Booking	200	4	0.7	2	280
Pet Sitter Marketplace	300	3	0.8	3	240
Health Data Tracking	150	5	0.6	4	112.5
Pet-Friendly Travel Booking	100	4	0.5	2	100
Grooming Service Booking	250	3	0.7	2	262.5
Personalized Food Recommendations	180	4	0.6	3	144

How RICE Was Computed

* Reach = people per week.

- * Impact = 1–5 scale.
- * Confidence = 0–1.
- * Effort = person-weeks.
- * RICE = (Reach × Impact × Confidence) ÷ Effort.

Okrs

Lean Objective & Key Results (Next Quarter)

Establish a validated platform concept and demonstrate initial market interest in Berlin.

Key Result	Baseline	Target	Data Source
Registered Pet Owners	0	500	Platform Database
Pet Service Providers Signed Up	0	50	CRM
User Engagement (Avg. weekly active users)	0	150	Platform Analytics

Storyboard

Customer Journey Storyboard (Quarter 1)

Discover

Element	Description
Trigger	Pet owner searches online for local pet services (e.g., "dog walker Berlin").
User Action	Clicks on a link to the platform via search result or social media ad. Lands on the platform's homepage.
Success Metric	Number of unique visitors to the platform's landing page.
Instrumentation	Google Analytics, platform analytics (page views, bounce rate).

Activate

Element	Description
Trigger	User views the platform's landing page, showcasing available services.
User Action	User creates a free account and completes their pet's profile (breed, age, health info).
Success Metric	Number of registered users with completed pet profiles.
Instrumentation	Platform analytics (registration rate, profile completion rate).

Outcome

Element	Description
Trigger	Registered user needs a pet sitter for an upcoming trip.
User Action	User searches for pet sitters in their area, views profiles, and books a pet sitter through the platform.
Success Metric	Number of successful bookings made through the platform.
Instrumentation	Platform analytics (search queries, booking rate, conversion rate).

Tools

Tools to Use

Tool	Why We Use It
Miro	Visual collaboration for brainstorming and journey mapping.
Typeform	Create surveys to gather user insights.
Google Analytics	Track website traffic and user behavior.
Amplitude	Product analytics to understand user engagement.
Figma	Design and prototype the platform's user interface.
Airtable	Organize and manage data related to users, services, and providers.
HubSpot	CRM for managing customer relationships and marketing automation.
Mailchimp	Email marketing for user communication and newsletters.

Synthesis

Synthesis Summary

This platform addresses the fragmented pet industry in Berlin by creating a central hub connecting pet owners with various services. Key users are pet owners, pet sitters, vets, and pet-related businesses.

- **Problem:** Fragmented pet services landscape.
- **Target Users:** Pet owners, sitters, vets, businesses.
- **Differentiation:** All-in-one platform for pet needs.
- **Top Feature:** Centralized booking and management for pet services.
- **Key Risk:** User adoption and competition from existing specialized services.
- **Next Proof Point:** Conduct market research to validate demand and identify key features, create a Customer Journey Storyboard (Quarter 1).

Three Month Plan

Next Three-Month Plan

This outlines key milestones for launching the pet industry platform in Berlin. Focus is on validating the core idea, understanding the market, and building a basic prototype. The plan prioritizes rapid learning and adaptation.

Milestone	Owner	Metric	Duration (days)
Market Research & Validation	Solo Founder	Number of user interviews	30
Prototype Development (v0.1)	Solo Founder	Completion of core features	45
User Testing & Feedback	Solo Founder	Number of feedback sessions	15
Platform Pitch Deck	Solo Founder	Completion of pitch deck	20
