

The idea of i want to create a platform for pet industry, proposal by Nextify

Idea Problem Snapshot

Pet owners face significant challenges in accessing essential services and information. They struggle to find reliable seaters, veterinarians, hotels, and breed-specific information. This issue is compounded by the need for social interaction for their pets and themselves, including playdates and events for celebrations or funerals.

JTBD by User Role

User Role	Jobs to be Done (JTBD)	Pain
Pet Owners	Find veterinarians and pet services	Difficulty locating trusted providers
	Arrange pet playdates and social events	Limited options for social interaction
	Access breed information and health resources	Fragmented and unreliable information
	Book pet-friendly accommodations	Inconvenience in finding suitable places
Pet Sitters	Connect with pet owners for sitting opportunities	Lack of visibility and outreach
	Manage bookings and schedules	Time-consuming coordination
Pet Hotels	Attract pet owners seeking accommodation	Competition and visibility challenges
	Provide detailed service information	Difficulty in showcasing unique offerings

Idea Brainstorm Uses

- **Service Locator:** Users search for veterinarians, pet sitters, and hotels through online directories or social media groups.
- **Event Coordination:** Pet owners organize playdates and social events via messaging apps or community boards, often relying on word-of-mouth referrals.
- **Information Gathering:** Users access breed information and health resources through various websites, leading to fragmented and unreliable data.
- **Booking Services:** Pet owners book accommodations and services by calling or visiting multiple websites, which is time-consuming and inconvenient.
- **Social Networking:** Pet owners connect with each other on social media platforms to share experiences and arrange meetups, lacking a dedicated space for pet-related interactions.
- **Health Monitoring:** Users track their pets' health and vaccination schedules using personal reminders or spreadsheets, resulting in missed appointments.
- **Travel Planning:** Pet owners seek pet-friendly travel options through travel blogs or forums, often facing challenges in finding suitable accommodations.
- **Celebration Planning:** Users organize pet-related celebrations and funerals through informal networks, which can lack structure and reliability.

Audience & Early Adopters

Segment	Why They Care
Pet Owners	Need reliable access to services and information for pets.
Pet Sitters	Seek visibility and opportunities for pet care jobs.
Pet Hotels	Want to attract more customers seeking accommodations.
Veterinarians	Desire to connect with pet owners for health services.
Pet Enthusiasts	Interested in socializing and networking with other pet owners.

Quick Market Notes

- **Market Size:** Growing pet industry with increasing spending on pet services.
- **Trends:** Rise in pet ownership and demand for convenience in pet care.
- **Competitors:** Existing platforms for pet services, but often fragmented.
- **User Needs:** Comprehensive, reliable, and easily accessible information.
- **Budget Constraints:** Focus on cost-effective solutions in the initial stages.

Competitors (Direct & Adjacent)

- **Rover** — Platform for pet sitting and dog walking services, connecting pet owners with caregivers.
- **Wag!** — On-demand dog walking and pet care services, focusing on convenience and reliability.
- **Petfinder** — Resource for adopting pets and finding local shelters, offering breed information and care tips.
- **BringFido** — Travel resource for pet-friendly accommodations and activities, catering to pet owners on the go.
- **BarkBuddy** — App for connecting potential pet adopters with available dogs, emphasizing breed-specific needs.

Market Size (TAM / SAM / SOM)

Assumptions:

Metric	Assumption	Value
Global innovation spending	Total global investment relevant to this idea	\$1500000000
Serviceable %	Fraction of TAM that is serviceable	20%
Obtainable %	Fraction of SAM realistically obtainable	10%

Calculations:

- TAM = $\$1500000000 \times 1 = \1500000000
- SAM = $\$1500000000 \times 0.20 = \300000000
- SOM = $\$300000000 \times 0.10 = \30000000

Assumptions & Risks

Key Assumptions

- Pet owners prefer a single platform for all pet-related services.
- Users will share their experiences and recommendations on the platform.

- There is sufficient demand for social events and playdates for pets.
- Pet service providers are willing to join and engage with the platform.
- Users value breed-specific information and resources.

Key Risks

- Low user engagement and retention on the platform.
- Difficulty in attracting and retaining service providers.
- Competition from existing platforms and services.
- Potential privacy concerns regarding user data.
- Limited budget may hinder platform development and marketing.

How to Test (Lean)

Assumption	Test	Success Metric	Timebox (months)
Single platform preference	Conduct surveys with pet owners	70%+ positive responses	2
User sharing behavior	Create a pilot community group	50+ active participants	3
Demand for social events	Host a small local pet event	30+ attendees	2
Provider engagement	Reach out to local service providers	10+ sign-ups	1
Value of breed info	Share breed resources on social media	100+ shares	2

Product Candidates

- Concept A — A comprehensive platform connecting pet owners with veterinarians, pet sitters, and hotels.
- Concept B — A social network for pet owners to arrange playdates and share experiences.
- Concept C — An informational hub for breed-specific care, health resources, and travel tips.

Feature Candidates & RICE

Feature	Reach	Impact	Confidence	Effort	RICE
Vet Finder	500	5	0.8	2	1000
Pet Sitter Marketplace	400	4	0.7	3	733
Playdate Organizer	300	3	0.6	4	450
Breed Information Database	600	4	0.9	3	720
Pet-Friendly Hotel Booking	350	5	0.7	2	612

How RICE Was Computed

- Reach = people per week.
- Impact = 1–5 scale.
- Confidence = 0–1.
- Effort = person-weeks.
- $RICE = (Reach \times Impact \times Confidence) \div Effort$.

Lean Objective & Key Results (Next Quarter)

Create a comprehensive platform that connects pet owners with essential services and social opportunities.

Key Result	Baseline	Target	Data Source
Users registered	0	500	Platform Analytics
Service providers listed	0	100	Platform Analytics
Social events organized	0	20	Event Management System

Customer Journey Storyboard (Quarter 1)

Discover

Element	Description
Trigger	Pet owners' need for reliable services and information.
User Action	Search online for veterinarians, pet sitters, and accommodations.
Success Metric	Number of users visiting the platform.
Instrumentation	Website analytics tracking unique visitors.

Activate

Element	Description
Trigger	Users find a trusted service provider.
User Action	Create an account to book services or connect with others.
Success Metric	Account creation rate.
Instrumentation	User registration tracking and conversion rates.

Outcome

Element	Description
Trigger	Successful booking of services or social events.
User Action	Users engage with pet services or attend events.
Success Metric	User satisfaction and repeat usage rate.
Instrumentation	Feedback surveys and usage analytics.

Tools to Use

Tool	Why We Use It
SurveyMonkey	Gather user feedback on needs and preferences
Trello	Organize tasks and manage project workflow
Figma	Design user interface and prototype features
Google Analytics	Track user engagement and platform performance
Slack	Facilitate team communication and collaboration
Zoom	Conduct virtual meetings for brainstorming

Synthesis Summary

- **Problem:** Pet owners struggle to find reliable pet services, including sitters, veterinarians, and accommodations, while also seeking social interaction for their pets.
- **Target Users:** Pet owners looking for trusted providers and social opportunities for their pets, as well as pet sitters and hotels needing visibility.
- **Differentiators:** A centralized platform offering comprehensive pet services, breed information, and social networking for pet owners.
- **Top Features:**
 - Service locator for veterinarians and pet sitters
 - Event planning for playdates and pet gatherings
 - Resource hub for breed-specific health and travel information
- **Key Risk:** Limited budget may hinder initial development and marketing efforts.
- **Next Proof Points:** Conduct user interviews to validate needs, develop a minimum viable product (MVP), and explore partnerships with local pet services.

Next Three-Month Plan

Milestone	Owner	Metric	Duration (days)
Market Research	Team	Number of insights gathered	15

Milestone	Owner	Metric	Duration (days)
Define User Personas	Team	Number of personas created	10
Develop Feature List	Product Lead	Number of features defined	10
Create Wireframes	Designer	Number of wireframes created	15
Build MVP	Development	MVP completion	30
User Testing	Team	Feedback sessions conducted	10
Refine Product Based on Feedback	Product Lead	Number of iterations	10
Prepare Launch Strategy	Marketing	Strategy document completed	10
